ARE PROUD TO PRESENT OUR 1953 CATALOG.

Jones and Scully, inc.

2154 N. W. 33RD AVENUE • MIAMI 42, FLORIDA

FOREWORD

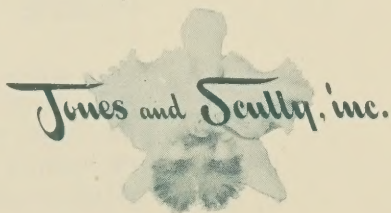

ORCHIDS, like people, differ. With plants, however, the Horticulturist is able to control the variation to a degree and by the use of certain proven parents can predetermine the variations—shape or form of flower, color, and many other hereditary factors.

THE amateur grower should bear in mind the great importance of selecting orchids which represent, generically, the traits which he desires in flowers. As we have pointed out so many times before, poor orchids require the same time to produce as good ones; therefore, do select your orchids cautiously, so that you can be proud of your plants when they bloom.

THE hybrids which we offer represent the finest and are the results of the work of the leading hybridists of the world. The parents used in these hybrids were carefully selected for outstanding qualities. And we believe that the merit of the resulting flowers will bring you many hours of enjoyment.

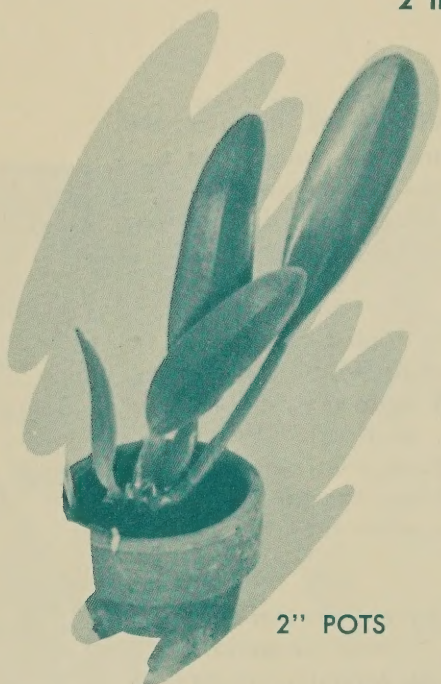

WE have tried to give you a brief description of what may be expected as to color and season of flower; however, it is difficult to describe accurately the color variations that may be expected in a fine orchid hybrid, since they cover such a wide range.

THE beginner is often confused as to the selection of plants which are suited to his given growing conditions; if we can be of assistance in any way in making your selections, we'll gladly help.

CATTLEYS AND ALLIED GENERA

2 INCH SEEDLINGS

2" POTS

★ LAVENDERS — ★ WHITES

★ Whites with colored labellums

1 Plant of any ONE Cross.....\$ 1.75

3 Plants of any ONE Cross.... 5.00

10 Plants of any ONE Cross.... 15.00

★ LAVENDER:

No. 364

LC. NELLA X BLC. CALIGULA

Large, heavy substance, purple blooms. Expected to flower in the winter months.

No. 489

**LC. LINNAEUS T. SAVAGE X C. GLORINETTE,
SUPERBA, F.C.C., R.H.S.**

A fine dark flower of good form and conformation. Will flower during late fall and winter.

★ WHITE:

No. 370

**C. JOYCE HANNINGTON, PERFECTION X BLC.
NANETTE**

Few white hybrids equal the quality of C. Joyce Hannington. It has been outstanding wherever it has been flowered. Some flowers developing from this hybrid may come with a splotch of color in the labellum, or it may produce all white flowers. We expect the C. Joyce Hannington parent will contribute some of its excellent form to the offspring. Season from Dec. through Feb.

**No. 488 C. O'BRIENIANA, ALBA X C. LODDIGESI, STANLEYI,
F.C.C.**

This will be a small, white, heavy-textured flower. It will be excellent for decorative use or cut flower purposes. Season is winter.

No. 490 C. DR. BEHIELS X C. DECEMBER SNOW

A fine, large white may be expected for Christmas and New Year. The parents have flowered year after year at the Holiday Season.

★ WHITE WITH COLORED LABELLUM:

No. 479 C. BALLAUREA X C. MAGGIE RAPHAEL

A very fine white with colored labellum can be expected for winter flowering.

AWARDS RECEIVED

Best Seedling Flowering for the First Time, 7th International Orchid Show, Miami, Fla., Feb. 1951.

Silver Certificate, South Florida Orchid Society, Jan. 1953.

Award of Merit, American Orchid Society, Jan. 1953.

LC. JAY MARKELL

var. Sam Sharpe, A. M. A. O. S.

ADULT CATTLEYA TYPES

Our collection of mature plants contains many of the finest hybrids, but too great in number to make a listing here of any particular crosses. However, we shall be glad to quote prices on any size or quantity of mature plants according to your needs. Correspondence is invited.

YELLOW SEEDLINGS

WE have, through the years, built a nice collection of yellow Cattleyas and have offered to our customers divisions from plants of known quality.

The breeding of yellow Cattleyas hybrids is still in its infancy and seedlings with yellow parentage have often flowered in varying shades of mauve, bronze, or even white with colored labellum. We cannot guarantee these plants to produce yellow flowers, but feel confident that a high percentage of them will be yellow. We offer them only on this basis. It is a chance to get fine yellows at a nominal price.

Yellows are usually slower growers and make more slender growths than the lavender hybrids.

2" POTS

1 Plant of any ONE Cross.....	\$ 2.50
3 Plants of any ONE Cross.....	7.00
10 Plants of any ONE Cross.....	22.50

No. 431 BLC. MALVERN X C. DOWIANA, AUREA

This should be a fine, canary-yellow flower with a rose- to red-colored labellum. Flowering season, late fall and winter.

No. 444 BLC. CONSUL GREIG X LC. ANNE WALKER

The flowers are expected to have yellow sepals and petals with rose labellums, to flower during the fall season.

No. 445 (LC. CAPRICE X C. DOWIANA) X BLC. MORNING SUN

The flowering season will be in the spring or early summer. Flowers expected to be yellow with rose-colored labellums.

No. 465 BLC. CHIEF JOSEPH, GOOD X LC. PLYMOUTH, FINE

This hybrid may produce some unusual colors, but yellow will predominate.

No. 477 (C. ROBERT H. JEWELL X L. TENEBROSA, WALTER GRANGE) X C. MRS. ED. ROEHR

This hybrid is certainly worth a chance, if you want yellows.

YELLOWS — Continued

No. 515 BLC. MORNING SUN X SELF.

There is more of a gamble on the outcome of self crosses than in breeding with another parent. However, we believe this particular cross has good possibilities and we predict yellow flowers with rose labellums.

CONTROLLABLE CATTLEYA SEEDLINGS

DURING the past few years a great deal of attention has been given to Cattleya hybrids whose flowering period can be controlled by the use of additional light. This is of particular advantage to the commercial grower because he can have plants in flower for the Holidays (Christmas, New Year, Easter, etc.) which would not ordinarily be blooming at these times.

You will notice that these hybrids have been developed from *C. labiata*, *C. gigas* and *C. Dowiana* parentage. These species have developed free-flowering, dark hybrids—characteristics that are always desirable. So whether or not you wish to control the flowering period, these hybrids are most attractive. Their natural flowering season will be during the fall and early winter.

2" POTS

1 Plant of any ONE Cross.....	\$ 2.00
3 Plants of any ONE Cross.....	5.50
10 Plants of any ONE Cross.....	17.50

No. 464 C. AMABILIS X C. PEETERSII

Fine dark flowers.

No. 466 C. VILLE DE LIEGE X C. BRUSSELS, ALBA

A good white for controllable flowering.

No. 467 BC. Mme. BRASSEUR HYE, SUPERLATIVE GOOD VAR. X LC. JOSEPH HAMPTON

A very vigorous grower. Both parents are fine darks. Some flowers should have flares in the petals.

No. 468 LC. JOSEPH HAMPTON X C. PEETERSII, FINE DARK

Two very fine dark hybrids; will produce some wonderful flowers.

CONTROLLABLE CATTLEYA SEEDLINGS — Continued

- No. 469 BLC. CHIEF JOSEPH X C. AMABILIS**
The Chief Joseph blood in this hybrid should intensify the dark color of the other parent.
- No. 471 C. LABIATA X LC. CUESTA, SANGRE DE DIOS**
Lc. Cuesta var. Sangre de Dios is a dark hybrid that speaks for itself. All who know this parent will realize the outstanding quality of this cross.
- No. 472 BLC. CHIEF JOSEPH, NICE YELLOW X LC. GERTRUDE HAMPTON**
In all probability, the yellow parentage of Blc. Chief Joseph will help to intensify the dark color of the other parent.
- No. 473 C. ANNE CLAUDE (C. amabilis, Fine var. x C. labiata, Best var.)**
Two fine strains that will produce fine dark flowers. We believe the C. labiata used is among the best available today.

COMMUNITY POTS

- No. 423 C. ENID, METEOR X C. OLD FORESTER**
C. Enid var. Meteor, is a fine dark Enid, made from the parent C. gigas var. Meteor, one of the finest C. gigas parents known. This, combined with a fine C. Old Forester, should make a dark, free flowering hybrid for winter blooming. 3" C. P.\$10.00

2½-INCH SEEDLINGS

We are sure you will agree that these 2½" plants are equivalent in size to plants ordinarily sold in 3" pots. They are strong, vigorous seedlings ready to be shifted to 3½" or 4" pots.

10 Plants of any ONE Cross.....	27.50

2½" POT

LAVENDER:

No. 269

LC. TEGUCIGALPA X C. TRIANAEI

Lc. Tegucigalpa is Lc. Helen Wilmer, grandis x C. Remy Cholet, maxima and is outstanding in color, form and substance. We have combined the good qualities of this hybrid with the free-growing habit of a fine variety of C. Trianaei. Both of these parents flower each year in late December. We recommend this hybrid for Christmas.

No. 317

BLC. DAWN ANGELA X C. TRIANAEI, A. C. BURRAGE

A fine hybrid of medium-light color. The shape of this flower should be excellent and some exhibition blooms can be expected. We know of no finer variety of C. Trianaei than A. C. Burrage. Dec.-Jan.

No. 340

LC. PRINCESS MARGARET, BONYCREST X LC. MIRANDA

This hybrid will be variable in color but offers a wonderful chance to get some unusual shades from dark purple to bronze. The seedlings look very promising, as the leaves are very heavy in texture and the plants are slower in growth—a characteristic often true of outstanding crosses. Nov.-Dec.

LAVENDER — Continued

- No. 372** **LC. MODEL, MOREDA, F.C.C. X C. REMY CHOLET, BRUGES**

A fine-shaped flower of good color. We expect the flowering season to be in late fall and early winter.

- No. 373** **LC. PRINCESS MARGARET, STONEHURST X (SLC. ILIONE X SLC. RADIANS, G.M.W., F.C.C.)**

This will undoubtedly be a very dark flower. The predominance of the *Laeliocattleya* has given it good growing habits. The young plants are robust growers.

WHITE:

- No. 338** **BLC. NANETTE X C. MOSSIAE, WAGNERI**

The Blc. Nanette used in this cross is pure white—shows no color in the labellum. *C. Mossiae, Wagneri* used as one parent should tend to bring the flowering season toward spring. A good bet for Easter blooms. The young plants show great promise in producing good flowers as they have very vigorous foliage.

- No. 370** **C. JOYCE HANNINGTON, PERFECTION X BLC. NANETTE**

Few white hybrids equal the quality of *C. Joyce Hannington*. It has been outstanding wherever it has been flowered. Some flowers developing from this hybrid may come with a splotch of color in the labellum, or it may produce all white flowers. We expect the *C. Joyce Hannington* parent will contribute some of its excellent form to the offspring. Dec.-Jan.-Feb.

WHITE WITH COLORED LABELLUM:

- No. 346** **C. ALWYNII, JANE FROMAN X LC. HASSALLI COWAN'S VAR., F.C.C.R.H.S.**

Two very fine parents were used in this hybrid. The seedlings are extremely vigorous growers and show promise of a good hybrid. Solid, brilliantly colored labellum can be expected. Nov.-Jan.

WHITE WITH COLORED LABELLUM — Continued

No. 381 C. LABIATA, ALBA, PRINCE OF WALES X C. ELEANORE, ALBA

This should be a fine white with colored labellum for late summer and early fall—a season popular for weddings and back-to-college-parties. Well-formed flowers can be expected. Brilliant yellow eyes will be a striking contrast in the colored labellum. We expect this hybrid to be subject to photo periodism.

MORE THAN MEETS THE EYE

The experienced orchid grower knows that one cannot judge the potential quality of an orchid plant by its appearance. The physical appearance of the plant indicates only whether the plant is in good condition, but does not reveal the many hours of thought and the years of care which have been involved to produce quality flowers.

It is necessary, therefore, that you place full faith in the grower from whom you purchase your plants. That is why year after year, our customers call on us again and again to supply their needs. All of our experience is at your service and we hope you will join the ranks of our many satisfied customers.

3½-INCH SEEDLINGS

OR the less patient orchid enthusiast these 3½" seedlings offer an excellent opportunity to obtain quality hybrids at reasonable cost and only a minimum waiting period must elapse before the flowers can be seen. These plants are ready for shifting into 5" pots. At **Orchidglade** we flower this size plant within a year.

LC. HAROLD PATTERSON

var. Orchidglade,
A.M.A.O.S.

LAVENDER:

- | | | |
|----------------|--|----------------|
| No. 179 | LC. WINDERMERE, F.C.C. X C. TITYUS,
Lc. Windermere is a fine parent for shape of flowers and the combination with C. Tityus should produce a free-flowering hybrid of fine shape. | \$ 7.00 |
| No. 185 | LC. WINDERMERE, F.C.C. X C. MONMOSS,
Lc. Windermere is a fine parent, outstanding for its flat, brilliantly-colored flowers. Blooming season during the winter months. C. Monmoss should make it free flowering and produce flowers during the months of Feb. and March. | \$ 8.00 |
| No. 195 | C. TRIUMPH X LC. JACQUINETTA
This should be a medium-dark Cattleya and one which we expect may flower on each new growth it makes. It will, undoubtedly, have a fine production record, producing as many as four to six flowers per stem. | \$ 7.00 |

CROSS No. 280

LC. DR. WALTER JONES X BC. HARTLAND

Both parents of this hybrid are outstanding for color, substance and shape. One parent, you will notice, has been named for the President of this Firm, Dr. Walter Jones. Although not a fast grower, our customers who have flowered this seedling report that it has been a large, well-shaped flower with exceptional possibilities. We recommend it for those interested in Show flowers.

3 1/2" POT - \$12.50

LC. DR. WALTER JONES

No. 345

LC. PRINCESS ISHTAR, HAWAIIAN QUEEN X LC. KISMET, ROTUNDA

\$ 8.00

Two outstanding parents, and we feel that this cross is a sure winner. Flowers will be medium dark. Winter.

WHITE:

No. 184

BLC. NANETTE X C. WHITE EMPRESS, F.C.C.

\$ 8.00

Blc. Nanette is one of the outstanding white Blcs. The Nanette used in this hybrid shows no color in the labellum. An extremely valuable hybrid of fine quality for winter flowering. We, as well as many of our customers, have had some excellent flowers from this cross the past winter.

No. 338

BLC. NANETTE X C. MOSSIAE, WAGNERI

\$ 8.00

The Blc. Nanette used in this cross is pure white and shows no color in the labellum. C. Mossiae, Wagneri used as one parent should tend to bring the flowering season toward spring. A good bet for Easter flowers.

No. 552

C. HELEN P. DANE X C. BEBE WHITE

\$ 8.00

Large white Cattleya flowering during the winter season.

to be subject to photo periodism. | |

SPECIAL OFFERINGS

CATTLEYAS AND ALLIED GENERA

No. 1 — SEEDLINGS

From time to time we have small groups of seedlings of fine crosses, too few in number to offer in our catalog, which we generally dispose of through sales at our greenhouses. However, so that our catalog customers may also have an opportunity to acquire some of these fine plants, we make the following offerings.

All plants will be properly labeled as to their parentage. Please do not request us to send a list of parentage prior to ordering.

SPECIAL OFFERS — Continued

- 10 — 2" Seedlings - Our selection \$15.00
(assorted colors: lavender, white, white with colored
labellum and yellow)
- 10 — 2½" Seedlings - Our selection \$25.00
(assorted colors: lavender, white, white with colored
labellum)
- 10 — 3½" Seedlings - Our selection \$70.00
(assorted colors: lavender, white, white with colored
labellum)
- In the above groups not more than two plants will be
of any one cross.

No. II — MATURE PLANTS

- 4 — Cattleya types - Flowering size - Our selection \$25.00
These will be hybrids of vigorous growth habit and
ideal for the beginner.

No. III — UNFLOWERED PLANTS

- 5 — 5" Unflowered hybrids - Our selection \$65.00
These will bloom on the new growth to give flowers
at intervals throughout the year. Included will be
three lavenders, one white and one white with col-
ored labellum.

No. IV — Mature Plants

- 5 — Mature hybrids of known quality (previously flow-
ered), our selection \$100.00
Included will be three lavenders, one white and one
white with colored labellum.

No. V — MATURE PLANTS

- 10 — Mature hybrids of known quality (previously flow-
ered), our selection \$200.00
Included will be two whites, two whites with colored
labellums, one yellow and five lavenders.

EXHIBITION PLANTS

If you are interested in exhibition plants — many of which have received awards — we will be glad to send you a list of the divisions which are available. Plants of this quality range in price from \$75.00 and up.

Blc. Dinsmore, F.C.C.A.O.S.

CYPRIPEDIUMS

The Cyripediums ("Lady Slipper Orchids") are easy to grow. Their magnificent flowers of brown, rose, green and red colors will last for several months in perfection.

Cyripediums offered here prefer a temperature of 60° F. or more. They do not like strong light and will do better if given a shaded location with 800 - 1200 ft. candle light. They can be grown well in conjunction with Phalaenopsids.

Cyripediums like plenty of humidity and are benefited by light syringings of water overhead. Applications of bonemeal and lime are advantageous. Plants may be divided and repotted after they flower.

CYP. ASHBURTONIAE VAR. SUPERBA (Cyp. *barbatum* x Cyp. *insigne*), flowering size \$15.00

A brown Cyripedium; flowers are borne on long stems, a nice plant to flower in fall.

CYP. BINGLEYENSE (Low's strain) (Cyp. *Charlesworthii* x Cyp. *Harrisianum*), flowering size \$15.00

A dark red type, flowering during early winter. Good for the Christmas Season.

CYP. HARRISIANUM (Cyp. *barbatum* x Cyp. *villosum*), flowering size \$10.00

Brown colored Cyripedium, flowering during winter.

CYP. MAUDIAE VAR. MAGNIFICUM (Cyp. *callosum*, *Sanderæ* x Cyp. *Lawrenceanum*, *Hyeaenum*), flowering size \$15.00

This is perhaps one of the favorites in the entire group of Cyripediums. A beautiful shade of light green. The dorsal sepal is white with light green lines. Flowers during various seasons of the year.

CYP. MOREAUANUM (Cyp. *callosum* x Cyp. *superciliare*), flowering size \$15.00

A good-size flower of beautiful coloration. Dorsal sepal is white with green veinations and a suffusion of pink to lavender in the ventral sepals. Dark spots on ventral sepals.

CYP. NEREID (Cyp. *Alma Gavaert* x Cyp. *callosum*), flowering size \$15.00

Another fine green Cyripedium, flowering during the winter season. A good green for St. Patrick's Day flowering.

CYPRIPEDIUMS — Continued

CYP. ST. ALBAN (Cyp. Antigone x Cyp. Harrisianum), flowering size\$7.50 - \$10.00

A nice, dark red Cypripedium to flower during late winter.

CYP. ST. HILDA (Cyp. Boxallii x Cyp. Curtisii), flowering size \$10.00

A pink Cypripedium to flower during the winter.

HAVE YOU A SWAN ORCHID?

Cynoches Chlorochilon is of easy culture and grows well under varied conditions. Chartreuse flowers are borne from the new pseudobulbs which are made up during summer and early fall. The palm-like foliage is deciduous — generally turning yellow just previous to the flowering. Water and feed the plants well during the growing season and keep on the dry side after flowering. Flowering season Oct. to Feb. \$5 - \$6 - \$7.50 EACH. LARGE SPECIMENS PRICED ACCORDINGLY.

ORCHID SUPPLIES

Many of our customers write us for information as to where they may secure osmunda — pot hangers — wire stakes — ribbon and other supplies. We do carry a small supply of these items and if we can be of service, we will be glad to accommodate.

DENDROBIUMS

This genus contains some of the finest of the spray orchids. They are of easy culture, although one must be aware of the particular requirements of each species in order to be successful in flowering them.

Dendrobium phalaenopsis and all of its varieties should be grown in the Cattleya house and given as much sun as possible without burning the foliage. Give the plants plenty of water when they are growing. When not in growth, withhold some of the water and give only enough to keep the plant from shriveling. Weak applications of liquid fertilizer are advantageous when the plants are in growth.

DENDROBIUMS — Continued

D. AGGREGATUM VAR. MAJUS

The bright yellow flowers of this little Dendrobium are most welcome in any greenhouse during the spring months. It is a small plant — pseudobulbs are 3-5" long and the leaves are about the same size. The profuseness of blooms dwarfs the plants when they are in flower. 3''-\$6; 3½-4''-\$7.50

D. JACQUELINE THOMAS (D. Gouldi, Tulagi x D. phal. Mauna Kea)
Nos. 541 and 542

This is a very interesting cross, as it is made with the all-white form of D. phal. Mauna Kea as well as the pink-labellum type. D. Gouldi var. Tulagi was collected from Guadal Canal and is one of the finest types in existence. This will, undoubtedly, be a very free-flowering hybrid. We would not like to predict the colors, but yellows and bronze types are most likely.

No. 541 The one parent, D. phal. Mauna Kea, used in this cross had white sepals and petals and a pink labellum. 2½''-\$5; 4''-\$7.50

No. 542 The one parent, D. phal. Mauna Kea, used in this cross was an all-white flower 2½''-\$5; 4''-\$7.50

D. PHALAEOPSIS VAR. DELICATA

An evergreen type of Dendrobium. Flowers are produced on sprays from the terminal end of the long canes. Background white with lavender to purple suffusion on sepals and petals. Sept.-Jan.

Flowering size \$12.50 - \$15.00 - \$17.50

Dendrobium
Phalaenopsids
var. Delightful — var.
Schroederianum, Dix-
on's — var. Delicata

DENDROBIUMS — Continued

D. PHALAENOPSIS VAR. DELIGHTFUL

Flowers very light; background white with less intense coloring than the variety "delicata". Sept.-Jan.

Flowering size \$20.00

D. PHALAENOPSIS VAR. SCHROEDERIANUM (DIXON'S VAR.)

The finest variety of colored D. phalaenopsis we have ever seen. Extremely dark flowers; in some cases the sepals are tipped with white making a beautiful contrast. Canes grow to 8 feet in height and produce sprays of over 20 flowers which last for weeks. Our stud plant produces as many as 10 sprays of flowers in a season. An excellent plant for use as decoration or for cut flowers. Sept.-Jan.

Flowering sizes \$25-\$35

ONCIDIUMS

ONC. AMPLIATUM VAR. MAJUS

Many-flowered arching, branched scapes from 2-4 feet long. Canary yellow 'Dancing Girls' 1 1/2" in diameter. Sepals blotched with red brown. One of the finest of the Oncidiums.

Flowering sizes \$10, \$12.50, \$15

ONC. CEBOLLETA

Flowers about 1 1/2" in diameter. Wavy, yellow and spotted with reddish brown: lip bright canary yellow, three-lobed. A many-flowered species with blossoms borne on branching flower scapes 15-30" high. Blooms for several months. Jan.-Feb.-Mar.

Flowering sizes \$3.50-\$5

ONCIDIUM — Continued

ONC. KRAMERIANUM

Flowers look like large butterflies — yellow with red-dish brown markings. Will continue to flower from same spike over a long period. A 'must' for every collection.

Flowering size **\$7.50-\$10.00**

Oncidium
Lanceanum

Onc.
Lanceanum
Seedling

ONC. LANCEANUM (from seed) NO. 100

One of the finest species of the genera. Leaves large, light green peppered with dark dots. Flowers char-treuse spotted with chocolate brown; extremely heavy texture and will last for a month. Excellent as a decorative plant and for cut flowers.

3 ½" \$7.50; Flowering size \$25.00

ONC. SPHACELATUM

Small yellow flowers on long racemes; one plant will produce several hundred flowers. Easy culture and ideal to grow outdoors in warm climates. Always in flower for Mother's Day.

Flowering sizes **\$7.50**

Shower of
Phalaenopsids
at
Orchidglade,
Feb. 1953

PHALAEENOPSIDS

Many of the Phalaenopsids listed here are outstanding crosses which will produce Show flowers in winter and early spring. In an effort to aid our customers in making their selections, the merits of each cross have been indicated — whether it is outstanding for its decorative value, as a cut flower or for some other characteristic.

NO. 188 P. DORIS (P. Elisabethae x P. Katherine Siegwart)

This is one of the finest of the Phalaenopsids on the market today. The flowers are large, white and some have tints of pink on the back of the sepals and petals. One of the finest Phals.

3½"	\$10.00
5" Flowering sizes	\$25.00

Phal. Doris

NO. 282 P. PAMELA X P. MONIQUE

When we originally offered this cross in 2" pots, we advised our customers that we thought it had good possibilities. Since that time we have flowered many fine ones. The hybrid is outstanding as a decorative plant as the flowers are well displayed on the spike.

5" Flowering size **\$15.00**

7" Sizes **\$20.00 - \$25.00**

NO. 333 P. DORIS X P. TETRAPLOID

No. 282

The Doris used here was pure white, of excellent form and measured 5" in diameter. It was crossed with a white Phalaenopsis (unknown parentage) of exceedingly heavy texture. The flowers of this hybrid will have great merit for lasting quality, size and conformation.

3½" Size **\$10.00**

5" Flowering size **\$25.00**

NO.384-5 P. KAREN (P. Katherine Siegwart, Helvetia x P. Doris)

Large white flowers of heavy texture. A fine hybrid for good cut flower production.

3½" Size **\$10.00**

5" Flowering size **\$15.00**

NO. 486 P. BOBBY BOY (P. Doris x P. Rimestadiana, Helvetia, A.M.)

We made this cross several years ago in order to increase the texture of P. Doris. The hybrid was a success and we have remade the hybrid, using a P. Doris of excellent conformation. The flowers have exceptional keeping quality and are recommended for cut flower use.

2" Size **\$ 2.00**

2½" Size **\$ 3.50**

NO. 512 P. CHIEFTAIN (P. Doris x P. La Canada)

This combination of parentage has produced some of the finest Phal. flowers we have seen. Flowers are white and very large.

2" Size **\$ 2.00 each**

2½" Size **\$ 3.50 each**

3½" Size **\$10.00 each**

P. David Boy

NO. 514 P. DAVID BOY (P. Schilleriana x P. Doris)

This is another remake of one of our hybrids. The flowers are larger than P. Schilleriana and a clear, even shade of light pink. Our previous cross, No. 208, in two different years won the South Florida Orchid Society Award for "Seedling Flowering for the First Time". We expect some fine flowers from this hybrid.

2" Size	\$ 2.50
2½" Size	\$ 4.00

NO. 525 (P. DORIS X P. NUULUKEA) VAR. DAINTY X P. DORIS, FINE VARIETY.

We have not had a chromosome count of the one parent: (P. Doris x P. Nuulukea) made, but we are sure that this selected plant is a result of an increased number of chromosomes. The flowers are very heavy in texture, have excellent conformation and a dainty pink coloration is noticed. This parent does not flower until spring. In all probability this offspring will lose its pink coloration and result in a white flower of fine texture and conformation.

2" Size	\$ 2.50 each
---------------	--------------

NO. 533 P. DORIS X P. VENUSTA

This is the same as our cross No. 334, which we offered three years ago. Certainly an outstanding white Phalaenopsis cross.

2" Size	\$ 2.00
2½" Size	\$ 3.50
3½" Size	\$10.00

ORCHID GLADE

ORCHID POTS

We are agents in the Miami area for two potteries
and offer our customers a complete stock of orchid pots.
Pots must be picked up at our nursery or we can arrange
for loads or part loads to be delivered from the potteries.

VANDAS

No orchid grower can afford to overlook this fine group of orchids. They are fast becoming one of the leading types of spray orchids. The flowers are of good size, generally up to 6" in diameter and the flat-type flower lends itself to all types of uses — corsages, cut flowers for arrangements, or display on the plant.

The strap-leaf type plants are quite decorative themselves. The plants should be given larger pots than one usually grows Cattleyas in and hung or placed where they can receive abundant light. We flower many of these types as many as six times a year. The plants in 3-inch pots will require about two years to flower and the ones in 4-inch pots about one year.

4" Vanda

In general, our Vanda plants are larger than those offered in the same size pot from the Hawaiian island. When you receive our Vandas, overpot them! It is generally beneficial to shift to a size pot two or three inches larger. Small shifts are not recommended. In potting large plants, charcoal or coarse black osmunda fibre should be used to insure good drainage.

NO. 275 V. TRICOLOR, BROADVIEW X V. MEM. T. IWASAKI

4" - \$7.50; 6" - \$12.50-\$15

During the past winter, we flowered our first plant of this hybrid. The flowers were about the size of V. Tri-Color — free flowering and produced one spray in November, another in February, followed by a third in March. The color is yellow with rust-colored markings. Flowers are of heavy texture. (See cut).

No. 275

VANDAS — Continued

NO. 354 V. BILL SUTTON (V. Manila x V. Sanderiana)

A fine shaped flower; dark pink dorsal sepal and petals. Ventral sepals similar to V. Sanderiana.

3" - \$5; 4" - \$10

NO. 356 V. MANILA X V. COERULEA

This should be a fine blue Vanda of good shape. Flowers will be flat and of good size.

3" - \$5; 4" - \$10

NO. 357 V. FLAMMEROLLE X V. ROTHSCHILDIANA

Flowers will be blue, quite large and round in shape.

3" - \$5; 4" - \$10

NO. 378 V. SUAVIS X V. ROTHSCHILDIANA

Similar to V. Herziana. Flowers will be dark blue and flat; exceedingly free flowering, good producer.

3" - \$5; 4" - \$10

NO. 427 V. HERZIANA X V. SANDERIANA

Similar to V. Rothschildiana. Flowers will be flat and have fine form.

3" - \$5; 4" - \$10

NO. 428 V. DENISONIANA, HEBRAICA X V. SANDERIANA

A difficult hybrid to predict. V. Denisoniana, hebraica is a cream-colored flower of heavy texture. Colors could be cream, buff, yellow and the like.

3" - \$5; 4" - \$10

NO. 429 V. FLAMMEROLLE X V. SANDERIANA

Pink to salmon shades. Flat flowers of fine form.

3" - \$5; 4" - \$10

NO. 496 V. BOSCHI X V. DEARI

Probably cream-colored flowers with purple to magenta markings.

3" - \$5; 4" - \$10

NO. 506 V. SUAVIS X V. ROTHSCHILDIANA

A free flowering hybrid. The blue color should predominate, although some odd colors may develop. Flowers should be of good size.

3" - \$5; 4" - \$10

NO. 516 V. KALALAU (V. Paki x V. Ellen Noa)

Small yellow flowers with green-red labellum.

3" - \$5; 4" - \$10

NO. 547 V. ERNEST FUJINAGA (V. Caroline Robinson x V. Sanderiana)

Large flat flowers of good color with yellow and brown spotting. Free flowering hybrid.

3" - \$5; 4" - \$10

Vanda Sanderiana

SPECIAL OFFERINGS

VANDAS

NO. VI — 10 - 3" Strap-leaf Vandas — our Selection.....\$45.00

NO. VII — 10 - 4" Strap-leaf Vandas — our Selection.....\$85.00

In the two above mentioned groups not over two of any one cross will be included and a general assortment of colors will be selected.

ORNAMENTAL COMPANIONS

ANTHURIUM ANDREANUM HYBRIDS

Flowering Anthuriums are very interesting and a beautiful addition to any orchid house. Each flower lasts for several months and as a new leaf opens a new flower develops. This plant prefers poor light conditions, plenty of moisture, good drainage. Colors in red, salmon or pink.

6" Pots: \$10.00 - \$12.50

ANTHURIUM CRYSTALLINUM

One of the finest of the ornamental foliage plants grown today. Easy culture; likes plenty of moisture, shade and warm temperature.

4" Pots: \$ 2.50

Anthurium Crystallinum

MISCELLANEOUS

ANGRAECUM SESQUIPEDALE species Madagascar

Flowers like six-pointed stars, about 5" in diameter, cream-colored and of heavy, waxy substance; the long nectary hangs beneath the labellum as a long, flowing beard. Flowers last several weeks. Unusual.

Flowering size \$35

ARACHNIS MOSCHIFERA X RENANTHERA STORIEI (No. 507)

A very unusual cross. Arachnis is a large, spider-like flower of chocolate brown and Renanthera Storiei is a blood-red color. The results of this hybrid are difficult to predict.

4" - \$10

CATTLEYA SKINNERI species Central America

Clusters of mauve flowers 3-4" in diameter, sepals and petals nearly equal. Easy culture, prefers an abundance of sunlight. Feb.-Mar.

Flowering size \$5

CATTLEYA LABIATA species Brazil

Large, dark lavender flowers. Vigorous grower. Blooms Sept.-Oct.-Nov.

Flowering sizes \$5 - \$10

CYCNOCHES CHLOROCHILON (The "Swan Orchid") species Panama

A fine orchid for corsages or display. Produces large leaves during summer, then in late fall flowers are produced on the heavy pseudobulbs — large plants producing as many as 15-20 flowers. Flowers are of a heavy, waxy nature, chartreuse in color and about 5" in diameter.

\$5 - \$6 - \$7.50. Large specimens priced accordingly.

DIACRIUM BICORNUTUM species West Indies

A most interesting plant for a collection. Flowers start opening during February and continue for several months. White, star-like flowers spotted with purple are produced on long spikes. We recommend this plant for those who like fragrance in the greenhouse. The perfume of these flowers is like that of orange blossoms and particularly fragrant in the morning.

Flowering size \$10

MISCELLANEOUS—Continued

EPIDENDRUM ATROPURPUREUM VAR. RANDII species Panama

Rare. Flowers are larger than the type. Sepals and petals brown with lighter borders, lip reddish-mauve. April.

Flowering size \$10

PERISTERIA ELATA (The "Holy Ghost" Orchid) species Panama

This is a large-growing terrestrial orchid preferring a semi-shaded location. In the fall it produces white, waxy flowers the parts of which portray an image of the Holy Ghost — hence its common name. Application of liquid fertilizers are advantageous during its growing season.

\$10-\$15

PHAIUS GRANDIFLORUS (syn *grandifolius*) "The Nun's Orchid"

One of the finest of the terrestrials. Yellow-brown flowers 3-4" across are produced during early spring on tall spikes. Prefers large pot of well-drained compost — fibrous soil and old osmunda fiber. During growing season, application of liquid fertilizer is beneficial.

7" pot \$7.50-\$10

RODRIGUEZIA SECUNDA species Trinidad

A small plant that adapts itself well to hanging as the scapes are somewhat arching. Flowers during late spring. A most interesting rose-pink color. Easy culture; prefers Cattleya house temperature.

3" - \$7.50; 4" - \$10

VANILLA PLANIFOLIA species

This is the plant from which the commercial Vanilla is obtained. It is a vining type and can be trained to climb along the wall or vent shaft.

15 - 18" cutting \$2.50

HOME ORCHID GROWING

BY

REBECCA TYSON NORTHEN

This book has been written primarily for the amateur grower and covers all of the various phases of orchid culture from seed to flower. We highly recommend it as the most up-to-date book on the subject.

Price \$6.50

“PYRALIN” ORCHID LABELS

Make Permanent Accurate Records

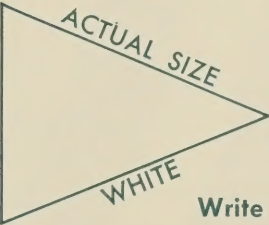

By using these indestructible labels to identify your orchid plants, you will increase the value of your collection immeasurably.

LARGE SIZE

LC. JAY MARKELL
VAR. SAM SHARPE
A.M.A.O.S. 1953
C. MAY MARKELL

AERIAL VIEW OF JONES AND SCULLY, INC.

CONDITIONS OF SALE

1. Orders will be filled in rotation.
2. No substitutions will be made on any order either as to size or variety without authorization.
3. We do **NOT** make a packing charge.
4. Unless otherwise advised, shipment will be made via Railway Express, charges collect. (All orders are F.O.B., Miami.) However, we recommend air express (or air freight on large orders) for shipments destined for countries outside of the United States and for shipments to be made during the winter months when there might be danger of the plants freezing en route.
5. Claims for damaged shipments must be filed immediately with the carrier by the consignee. We make every effort to pack carefully, and our responsibility ends when the shipment is accepted by the carrier.
6. On the authority of your local plant quarantine station, please advise us if there are any unusual requirements pertaining to the shipment of plants into your territory or country.
7. Our firm has been properly authorized to handle shipments to Hawaii. However, the customer must forward with his order his permit number which he must obtain from the Board of Commissioners of Agriculture and Forestry, Honolulu.
8. Unless your credit has been established with us, kindly enclose check, money order, or bank draft to cover payment of your order in full.
9. **NON-WARRANTY:** We, JONES AND SCULLY, INC., give no warranty, express or implied, as to the productiveness of any of the plants we sell, and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of these plants.
